# Change of Human Life ; Economy

Global income distribution in 1800, 1975, and 2010 Our World in Data

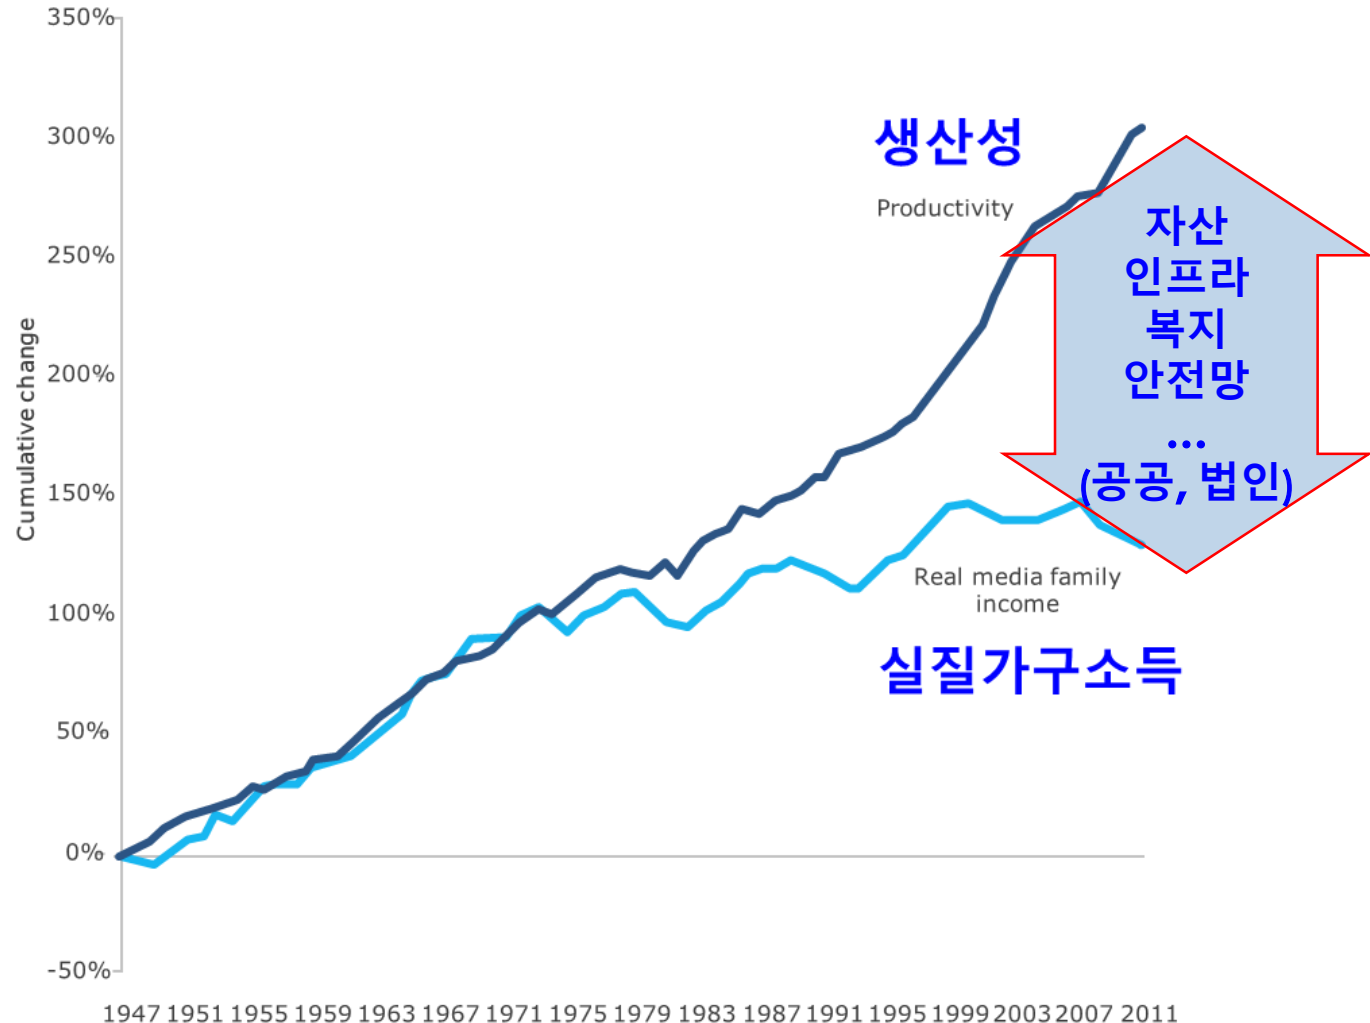

Income is measured by adjusting for price changes over time and for price differences between countries (purchasing power parity (PPP) adjustment). These estimates are based on reconstructed National Accounts and within-country inequality measures. Non-market income (e.g. through home production such as subsistence farming) is taken into account.

Europe Asia and Pacific Africa North- and South America
