Skills Gaps in HR

Data Literacy and Digital Integration are the competencies least present across HR professionals...

Data Literacy

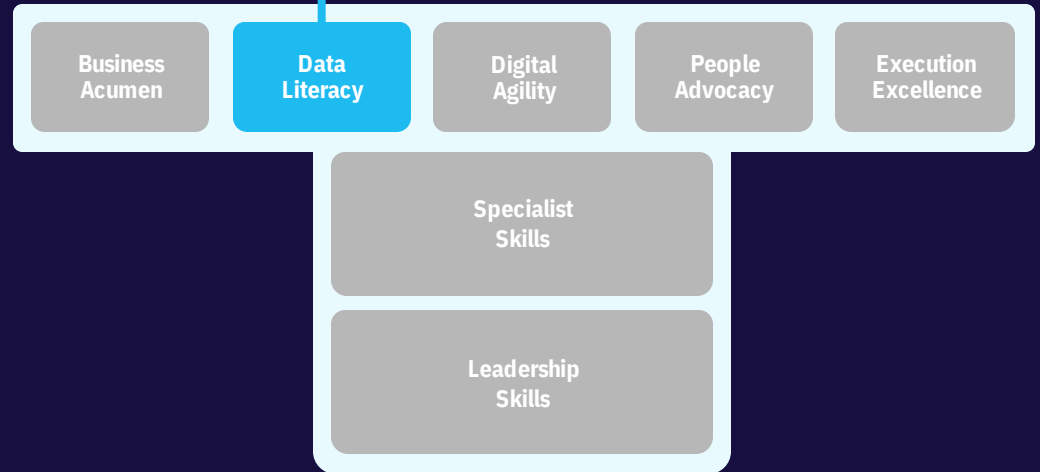

The ability to analyze, interpret and communicate people's data to derive actionable insights, inform decision-making, and assess HR's contribution to achieving strategic business objectives.

Data Driven

Grasps & uses data to make decisions and inform practice.

Analytics Translation

Translates people data into actionable insights.

Data Literacy

The ability to analyze, interpret and communicate people's data to derive actionable insights, inform decision-making, and assess HR's contribution to achieving strategic business objectives.

Data Driven

Grasps & uses data to make decisions and inform practice.

Analytics Translation

Translates people data into actionable insights.

WHAT DO I DO?

HOW DO I DO IT?

Reads Data

Analyze and understand data from a variety of sources

"I use various techniques to read data from multiple sources."

Creates Data

Identifies opportunities to set KPIs and create value-adding data

"I create data that helps the organization answer questions, evaluate outcomes, and forecast trends and probabilities."

Applies Data (Evidence-Based Practice)

Aggregates and applies data from multiple sources to inform decision-making

"I use data to drive evidence based decision making."

Ethical Data Application

Works with data in an ethical manner that protects the confidentiality and rights of all stakeholders

"I use data ethically and responsibly to protect privacy and promote trust in people analytics initiatives."

Data Literacy

The ability to analyze, interpret and communicate people's data to derive actionable insights, inform decision-making, and assess HR's contribution to achieving strategic business objectives.

Data Driven

Grasps & uses data to make decisions and inform practice.

Analytics Translation

Translates people data into actionable insights.

WHAT DO I DO?

HOW DO I DO IT?

Develops Relevant hypotheses

Identifies and defines business problems that can be solved with (people) data analytics

"I identify knowledge gaps and answer specific questions with data analysis."

Communicates Data Stories

Packages, visualizes and relays key data outcomes in a way that resonates with the target audience

"I consciously package and impart data insights in a way that promotes understanding, decision-making, and actionable outcomes."

Champions Analytics Adoption

Creates an environment that supports and fosters critical use of data for decision making

"I build a data-driven culture that transcends different technical skill levels and empowers others to utilize data better."

We need future-oriented skills...

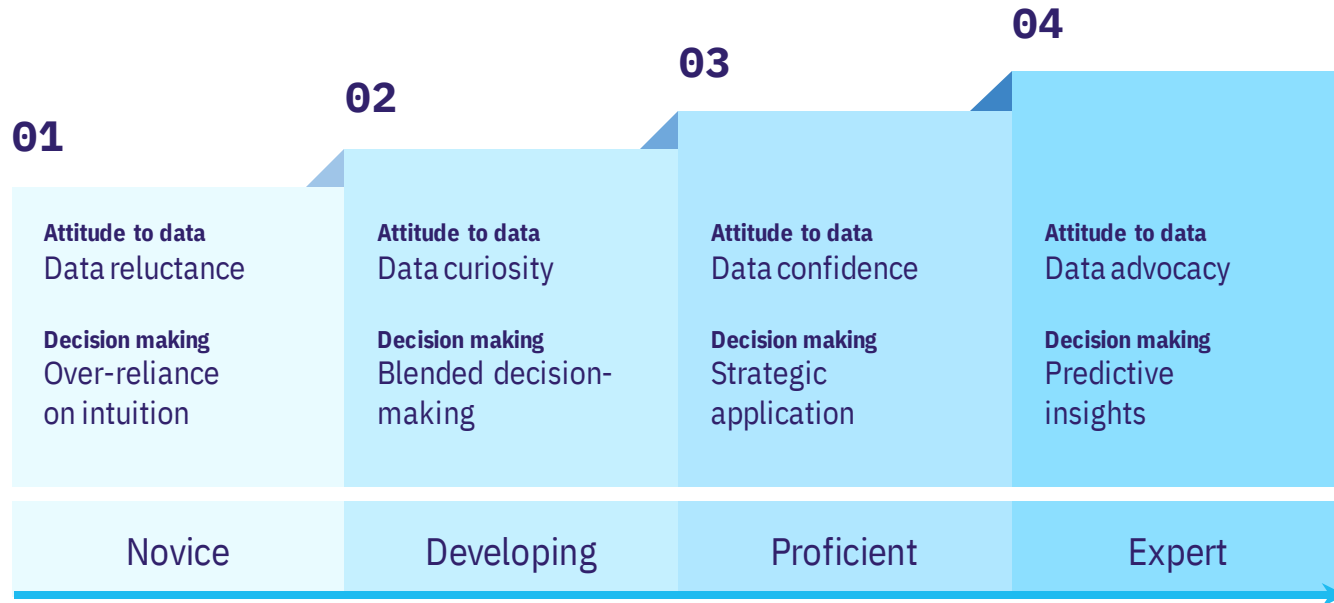

Instead, we get...
